

NAVANIT SHARMA

Machine Learning Engineer | AI Systems Developer | MLOps & Cloud AI
+977-9844536681 · navanit018@gmail.com · [linkedin.com/in/navanit](https://www.linkedin.com/in/navanit) · github.com/navanit

CORE COMPETENCIES

End-to-End ML Pipelines · Model Benchmarking & Evaluation · Deep Learning (CNN/PyTorch)
Google Cloud Vertex AI · MLOps & Model Monitoring · Production Deployment (Streamlit)
Computer Vision (OpenCV) · Feature Engineering · AI Application Development

PROFESSIONAL SUMMARY

Ambitious ML Engineering student who ships production AI — not just notebooks. Proven ability to take a problem from raw data to a deployed, user-facing application, demonstrated across four independent projects spanning healthcare AI, computer vision, and voice interfaces. Holds two Google Cloud MLOps certifications alongside Anthropic AI credentials. Brings a strong algorithmic foundation, a hands-on cloud toolchain, and the drive to contribute meaningfully from day one in a high-performance AI team.

PROJECTS

Breast Cancer Prediction System · Python · Scikit-learn · XGBoost · Streamlit Cloud

2024

- **Benchmarked 7 ML algorithms** on real-world tumor data; XGBoost achieved the top ROC-AUC score, outperforming baseline Logistic Regression — demonstrating rigorous model selection discipline
- **Built production-grade pipeline:** data ingestion → cleaning → feature scaling → cross-validated training → evaluation → live web deployment, all reproducible end-to-end
- **Deployed on Streamlit Cloud** — zero setup for end users; clinicians can query the model directly from a browser

Plant Disease Detection · PyTorch · CNN · OpenCV · Streamlit

2024

- **Designed and trained a custom CNN** for multi-class plant disease classification; applied augmentation strategies (flips, rotations, brightness jitter) to reduce overfitting on limited agricultural image data
- **Deployed real-time inference API** with image upload, preprocessing, and confidence-scored predictions — bridging research model to usable farmer-facing tool

Jarvis 2.0 — AI Voice Assistant · Python · SpeechRecognition · NLP

2024

- **Engineered modular command execution engine** with plugin-style architecture; adding new capabilities requires zero changes to the core pipeline
- **Implemented real-time audio processing** with minimal latency, enabling responsive conversational interactions

Telehealth Platform · Python · Web Architecture

2024

- **Architected a scalable remote consultation system** with clean MVC separation and extensible module design — built for a production healthcare environment

TECHNICAL SKILLS

Languages: Python

ML Algorithms: Logistic Regression, KNN, SVM, Decision Trees, Random Forest, XGBoost (Scikit-learn)

Deep Learning: PyTorch · CNN architecture design, training loops, transfer learning fundamentals

Computer Vision: OpenCV · image preprocessing, augmentation pipelines, inference optimization

MLOps & Cloud: Google Vertex AI · model evaluation, monitoring, versioning · Streamlit Cloud

Fundamentals: Data Structures · Algorithm Design · OOP · REST API concepts

EDUCATION

BEIT — Bachelor of Engineering in Information Technology (Ongoing) · Nepal College of Information Technology — Pokhara University

2023 – Present

Focus: Machine Learning, Deep Learning, Computer Vision, Algorithms

Intermediate Level — Science · Kathmandu Model College, Bagbazar

Passed 2023

CERTIFICATIONS

- **MLOps for Generative AI** — Google Cloud 2025
- **MLOps with Vertex AI: Model Evaluation** — Google Cloud 2026
- **Claude Code in Action** — Anthropic 2026
- **AI Fluency for Educators** — Anthropic 2025
