Summary

Machine Learning-focused IT student experienced in developing end-to-end ML pipelines, benchmarking supervised learning models, and deploying AI-powered applications. Strong foundation in data preprocessing, model evaluation, and deep learning using Python and PyTorch. Seeking competitive AI/ML engineering opportunities in research-driven and large-scale production environments.

Education

Nepal College of Information Technology

2023 – 2027

Bachelor's in Information Technology, Pokhara University

Projects

Jarvis 2.0 – AI Voice Assistant

- Developed modular voice-controlled assistant integrating speech recognition and command execution pipelines.
- Implemented real-time voice input processing and task automation features.
- Designed extensible architecture for scalable feature expansion.
- GitHub Repository

Breast Cancer Prediction System

- Built end-to-end ML pipeline for tumor classification using supervised learning models.
- Benchmarked 7 algorithms including SVM, Random Forest, XGBoost, and Logistic Regression.
- Evaluated using ROC-AUC and accuracy metrics; implemented feature scaling and preprocessing.
- Deployed interactive web application using Streamlit Cloud.
- GitHub Repository

Plant Disease Detection (Deep Learning)

- Developed CNN-based image classification model for plant disease detection.
- Implemented preprocessing, model inference, and web-based deployment using Streamlit.
- GitHub Repository

Telehealth Platform

- Designed healthcare web system enabling remote consultation workflows.
- Focused on scalable architecture and modular backend structure.
- GitHub Repository

Technical Skills

Languages: Python

Machine Learning: SVM, Logistic Regression, KNN, Decision Trees, Random Forest, XGBoost

Deep Learning: PyTorch, CNN Fundamentals

Computer Vision: OpenCV, Image Processing

MLOps: Vertex AI, Model Evaluation

Deployment: Streamlit Cloud

Core CS: Data Structures, Algorithm Fundamentals

Certifications

Machine Learning Operations (MLOps) for Generative AI – Google Cloud (2025)

Machine Learning Operations with Vertex AI: Model Evaluation – Google Cloud (2026)

AI Fluency for Educators – Anthropic

Claude Code in Action – Anthropic (2026)
